Chapter 31 – Quick Reference Card
Appendix – Document Control
Closing – Operating Independently From Here

Executive Summary

DECHUB BRIDGE sells outcomes, not headcount. The Business Analyst is the function that turns a Dubai market-entry moment into a signed, managed creative and marketing engagement — and this manual is the operating system for doing that on repeat.

DECHUB BRIDGE deploys a full Creative, Marketing, and Technology Talent Layer — designers, developers, writers, performance marketers, and strategists — behind a managed-service wrapper, in the model pioneered for compliance-led global employment by platforms like Deel, but applied to creative and marketing capability instead of individual contractor placement. Clients buy an outcome: a functioning marketing and digital operation, delivered by a team they never have to individually hire, manage, or carry on payroll.

The single highest-leverage go-to-market channel for this model is **Corporate Service Providers (CSPs)** and business-setup consultants in Dubai and the wider GCC. They are the first point of contact for every enterprise opening a local office, and almost none of them carry an in-house marketing or technology bench. That gap is the opportunity, and the Business Analyst is the person who finds it, qualifies it, and turns it into pipeline.

This manual covers, in order: the business model and market context a new analyst needs to operate independently; the full list of responsibilities with explanations of how and why; a day-by-day 30-day onboarding and execution plan; the mechanics of lead generation, ICP definition, and lead sourcing; the discovery, pitch, and proposal process; how the sales pipeline is structured and reported; how the Business Analyst coordinates with the rest of the organization; KPIs and reporting cadences; daily, weekly, and monthly checklists; SOPs for the recurring tasks; the recommended tool stack; a template library; and a set of best practices for communication, research, and client handling.

HOW TO USE THIS MANUAL

Read Chapters 1-3 once, in full, before your first day. Chapter 5 (the 30-Day Plan) is your day-by-day script for your first month — follow it in order. Chapters 6 onward are reference material: return to them whenever you're mid-task and need the exact process, template, or checklist for what you're doing right now.

Company Background & Business Model

We are not a staffing agency. We are a managed creative and marketing operation that a client rents instead of builds.

What DECHUB BRIDGE is

DECHUB BRIDGE is a talent augmentation venture built on a platform model similar to Deel — but where Deel solves global employment and payroll for individual contractors, DECHUB BRIDGE solves **go-to-market execution capability** for companies that need a marketing and digital function fast, without building one from scratch. We deploy pre-vetted, managed specialists across four functional clusters:

CLUSTER	ROLES
Creative & Design	UI/UX Designers, Graphic Designers, Motion Designers, Brand Designers, Creative Directors
Engineering	Web Developers, Frontend Developers, Backend Developers, Full Stack Developers
Content & Growth	Copywriters, Content Writers, SEO Specialists, Performance Marketers, Social Media Managers
Strategy & Operations	Marketing Strategists, AI Specialists, Video Editors, Marketing Operations Specialists

Why "talent layer," not "staffing"

Traditional staffing sells manpower: a resume, a day rate, and a contract the client has to manage. DECHUB BRIDGE sells a **Creative & Marketing Talent Layer** — an entire outsourced function, backed by our own agency, with senior marketing oversight built in. The distinction matters in three concrete ways, and every Business Analyst needs to be able to explain all three without notes:

- **Senior oversight is included.** Clients don't manage individual freelancers — a senior marketing lead on our side owns quality, direction, and output.
- **The unit of delivery is a capability, not a headcount.** A client buys "a functioning content and design operation," not "one designer and one writer."
- **Compliance is simplified.** Because the client is purchasing a managed service rather than engaging individual contract labor, the usual compliance overhead of contractor classification, local labor law, and payroll administration is substantially reduced. This is a genuine commercial advantage — it is not a marketing exaggeration — and it is often the detail that unlocks a deal with a legal or finance stakeholder who would otherwise slow things down.

PLAYBOOK NOTE

When you are on a discovery call, do not describe this as "we provide freelancers." That single phrase resets the client's mental model back to staffing and drags the whole conversation into a day-rate negotiation. Describe it as "a managed marketing and creative function you plug in" every single time.

What clients actually receive

- Senior marketing oversight
 - Dedicated specialists matched to their scope
 - End-to-end digital content support
- Marketing infrastructure (tooling, process, reporting)
 - Strategy planning
 - Creative execution and talent augmentation on demand

- DECHUB BRIDGE sells a managed outcome – a talent layer – not individual headcount.

- Four capability clusters: Creative & Design, Engineering, Content & Growth, Strategy & Operations.
- The compliance simplification of a managed service is a real, sellable advantage – learn it cold.

The Business Opportunity

Every enterprise that opens a Dubai office needs marketing capability on day one — and the people who meet them first almost never have it to offer.

The target market

Our primary market is made up of mid-sized and large enterprises that are expanding internationally, opening new offices, or entering Dubai and the wider GCC for the first time. This includes:

- Mid-sized enterprises scaling into new geographies
- Large enterprises consolidating regional operations
- Companies specifically entering Dubai and the UAE
- GCC companies expanding domestically
- Corporate Service Providers (CSPs) and Business/Free Zone Setup Consultants — our primary channel, covered in depth below

The moment of need

When an enterprise opens a new office in Dubai, a predictable and urgent set of needs appears almost immediately — usually before the office has even signed its lease:

This creates immediate demand for branding, a website, marketing strategy, designers, developers, copywriters, local marketing execution, digital presence, and marketing infrastructure — the exact scope DECHUB BRIDGE is built to deliver as one managed engagement.

Why Corporate Service Providers are the channel

Corporate Service Providers and Free Zone Consultants are structurally positioned to encounter these clients before anyone else — they are the entity that helps a foreign company incorporate, license, and set up locally, which means they are in the room during the exact window when marketing and technology decisions are being made. Critically, **most CSPs do not have an internal marketing team or a technology team of their own.** They are excellent at company formation, licensing, and compliance — and they routinely watch marketing-and-digital budget walk out the door to whichever vendor the client happens to find independently.

WHY THIS MATTERS FOR YOU

A CSP is not a lead. A CSP is a **lead source that produces recurring leads** for as long as the partnership holds. One strong CSP partnership can outperform months of individual cold outreach, because every new client the CSP onboards is a fresh, warm introduction into a company that already needs what we sell.

The strategic partnership opportunity

Because CSPs lack in-house marketing and technology capability, and because their clients need it immediately upon setup, there is a natural white-label or co-sell partnership opportunity: the CSP keeps ownership of the client relationship and the compliance/incorporation revenue, while DECHUB BRIDGE becomes their standing answer to "who do you use for branding, websites, and marketing?" This is the wedge the Business Analyst is responsible for finding and opening.

CHAPTER TAKEAWAYS

- The buying trigger is market entry – specifically, opening a Dubai/GCC office.
- CSPs and Free Zone Consultants see these clients first and usually cannot serve the marketing/tech need themselves.
- The goal is not one client — it's a standing partnership with the CSP that produces recurring introductions.

The Business Analyst: Role & Objective

You are the person who turns "someone out there probably needs this" into a qualified conversation, a proposal, and a signature.

OBJECTIVE, IN ONE SENTENCE

The Business Analyst identifies potential clients, qualifies opportunities, prepares strategic recommendations, coordinates with internal teams, and supports the sales process from research through proposal and handoff.

Where the role sits

The Business Analyst sits at the front of the revenue engine, upstream of Sales and alongside Marketing. You do not close deals alone, but no deal reaches the closing stage without work you produced first: the research that identified the opportunity, the qualification that confirmed it was worth pursuing, the discovery notes that shaped the pitch, and the proposal draft that became the contract.

What "good" looks like in this role

- You can name, from memory, the three questions that separate a qualified lead from a curious one (covered in Chapter 6).
- Your CRM is always the source of truth — if it isn't in the CRM, it didn't happen.
- Every proposal you help produce is grounded in a real discovery conversation, not a template filled in from guesses.
- You can walk into any internal meeting and state, without checking notes, where every deal in your pipeline currently stands and what the next action on it is.

COMMON FAILURE MODE TO AVOID

The most common way this role underperforms is not lack of effort — it's volume without qualification. Ten unqualified leads in the CRM look like progress and are actually a liability: they consume follow-up time, distort pipeline reporting, and crowd out the two or three leads that were genuinely ready to buy. Qualify hard, early, and often.

Primary Responsibilities

Twenty-one responsibilities, grouped into five clusters that mirror how a deal actually moves — research, sourcing, qualifying, closing, and reporting.

Cluster A — Research

Market Research

Ongoing tracking of Dubai/GCC market-entry activity: which sectors are expanding into the region, which free zones are seeing the most new registrations, and what regulatory or economic shifts are driving relocation decisions. This research feeds directly into which industries you prioritize for outreach each month.

Competitor Research

Maintain a living view of who else offers creative/marketing talent augmentation, staffing, or agency services into the same buyer set — their pricing signals, positioning, and the gaps in their offer that DECHUB BRIDGE' managed-service model closes.

Industry Research

Before any discovery call, you should be able to speak intelligently about the prospect's industry: its typical marketing spend patterns, its common go-to-market playbook, and the language its buyers use. Ten minutes of industry research prevents a discovery call from sounding generic.

Cluster B — Sourcing

Lead Generation

The umbrella activity of identifying net-new prospects — both CSPs/consultants (channel partners) and direct enterprise buyers — across the sources detailed in Chapter 8.

Lead Scraping

The technical extraction of prospect data (names, titles, companies, contact details, firmographic signals) from LinkedIn, directories, and tools such as Apollo, Clay, and Google Maps, using the processes in Chapter 7.

Lead Qualification

Applying the ICP (Chapter 7) and a scoring rubric to every scraped or inbound lead, so that only leads with a realistic path to a deal enter active outreach.

Lead Grooming

The ongoing work of keeping a qualified-but-not-yet-ready lead warm: light-touch engagement (relevant content, a check-in, an event invite) until timing or budget aligns.

ICP Identification

Continuously refining the Ideal Customer Profile itself based on which qualified leads actually convert, so the definition of "who to target" gets sharper every quarter rather than staying static.

Cluster C — Pipeline & Client Work

CRM Management

Every lead, every interaction, every stage change lives in the CRM the same day it happens. This is non-negotiable — see

the SOP in Chapter 17.

Sales Pipeline Management

Keeping every opportunity correctly staged (Chapter 12), with a clear next action and owner, so that nothing goes quiet without someone noticing.

Client Research

Deep-dive research on a specific prospect once they enter active pipeline: their leadership team, recent news, existing digital presence, and any public signal of what they're trying to achieve.

Business Requirement Analysis

Translating what a client says they want into a structured scope: what they actually need, in what sequence, and with what constraints (budget, timeline, existing assets).

Presentation Preparation

Assembling the capability deck, case studies, and supporting visuals for pitch meetings (Chapter 10), tailored to the specific prospect rather than sent as a generic deck.

Proposal Preparation

Drafting the scope of work, pricing, and timeline documents that move a qualified opportunity into negotiation (Chapter 11).

Strategy Documentation

Writing the internal strategy note that accompanies any non-trivial opportunity: why this client, why now, what the recommended approach is, and what risks to watch.

Stakeholder Coordination

Looping in the right internal teams (Chapter 13) at the right stage of a deal, so creative, engineering, and leadership are never surprised by a commitment made in a client conversation.

Discovery Call Preparation

Building the question set, agenda, and background brief for every discovery call (Chapter 9) before it happens — never walking in cold.

Meeting Notes

Structured, shareable notes from every client and internal meeting, distributed within 24 hours, using the template in Chapter 19.

Follow-up Management

Tracking every commitment made in a meeting or email — by us or by the client — and making sure it is actioned or chased on schedule.

Cluster D — Measurement

KPI Tracking

Logging the metrics in Chapter 14 daily, not retrospectively at the end of the week.

Weekly Reporting

A structured weekly summary of pipeline movement, activity volume, and blockers, delivered every Friday (Chapter 16).

Monthly Reporting

A deeper monthly review of pipeline health, lead quality, and conversion trends, with recommendations for the following month (Chapter 16).

How a typical week divides across these clusters

CLUSTER	TYPICAL SHARE OF A WORKING WEEK
Research (Market, Competitor, Industry)	10-15% — concentrated early, then maintained lightly
Sourcing (Lead Gen, Scraping, Qualification, Grooming, ICP)	35-40% — the largest recurring block
Pipeline & Client Work (CRM through Follow-up Management)	35-40% — grows as active deals accumulate
Measurement (KPI Tracking, Weekly/Monthly Reporting)	5-10% — small but non-negotiable

CHAPTER TAKEAWAYS

- Every responsibility maps to one of five clusters: Research, Sourcing, Pipeline & Client Work, or Measurement.
- Nothing here is a one-off task — each is a recurring discipline with a cadence defined later in this manual.
- If you can't place a task you're doing into one of these 21 items, ask whether it's actually part of the role.

The 30-Day Action Plan

A day-by-day script for your first month — each day builds on the last, moving you from onboarding to running the full lead-to-proposal cycle independently.

HOW TO RUN THIS CHAPTER

Treat each day as a checklist, not a suggestion. If a day's tasks genuinely cannot be finished in the estimated time, carry the remainder into the next day rather than skipping the deliverable — every day's output feeds the day after it.

Week 1 — Foundation, Research & Systems

DAYS 1-7

Day 1

ORIENTATION

OBJECTIVE

Understand the business model, the offer, and where you fit.

TASKS

- Read Chapters 1-3 of this manual in full
- Shadow a call or recording of a past client pitch if available
- Set up CRM, email, LinkedIn, and Slack/Teams access

DELIVERABLE

One-page personal summary of the DECHUB BRIDGE offer, in your own words

EXPECTED OUTCOME

You can explain the business model to a stranger in 60 seconds without notes

TOOLS

CRM, Slack/Teams, LinkedIn

KPI

Day 2

MARKET LANDSCAPE

OBJECTIVE

Build a working map of the Dubai/GCC market-entry landscape.

TASKS

- Research 10 active free zones and their typical tenant industries
- Identify 5 sectors currently expanding into Dubai most actively
- Log findings in the Market Research tracker

DELIVERABLE

Market Landscape brief (1-2 pages)

EXPECTED OUTCOME

You know which industries to prioritize this month

TOOLS

Google Search, Dubai Chamber, Crunchbase

KPI

1 brief completed · EST. TIME 5-6 hrs

Day 3

OBJECTIVE

Understand who else competes for this budget.

TASKS

- Identify 8-10 competing agencies/staffing platforms serving Dubai market-entrants
- Note their positioning, pricing signals, and service gaps
- Compare each against our managed-service model

DELIVERABLE

Competitor comparison table

EXPECTED OUTCOME

You can articulate our differentiation against any named competitor

TOOLS

Google Search, competitor websites, LinkedIn

KPI

8+ competitors logged · EST. TIME 5 hrs

Day 4

OBJECTIVE

Internalize the Ideal Customer Profile from Chapter 7.

TASKS

- Study the ICP criteria (size, revenue, geography, decision-makers)
- Build a scoring rubric spreadsheet
- Identify 3 real companies that would score as strong-fit ICP

DELIVERABLE

ICP scoring rubric + 3 example companies

EXPECTED OUTCOME

You can score any incoming lead against the ICP in under 2 minutes

TOOLS

Spreadsheet, LinkedIn Sales Navigator

KPI

1 rubric finalized · EST. TIME 5 hrs

Day 5

OBJECTIVE

Map the Corporate Service Provider and Free Zone Consultant ecosystem.

TASKS

- Identify 25 CSPs/business-setup consultants operating in Dubai
- Note their size, specialty free zones, and public client base
- Rank them by likely partnership fit

DELIVERABLE

CSP master list (25 entries, ranked)

EXPECTED OUTCOME

You have a working target list for channel partnership outreach

TOOLS

Google Search, LinkedIn, Dubai Chamber directory

KPI

25 CSPs logged · EST. TIME 6 hrs

Day 6

TOOL STACK SETUP

OBJECTIVE

Get fully operational across the recommended tool stack.

TASKS

- Configure CRM pipeline stages and lead fields
- Set up LinkedIn Sales Navigator saved searches
- Configure lead-scraping tool (Apollo/Clay) with initial filters

DELIVERABLE

Working CRM pipeline + saved search configurations

EXPECTED OUTCOME

You can generate a lead list on demand without asking for help

TOOLS

CRM, Apollo, Clay, LinkedIn Sales Navigator

KPI

Tool stack fully configured · EST. TIME 5 hrs

Day 7

WEEK 1 REVIEW

OBJECTIVE

Consolidate week 1 learning and set week 2 targets.

TASKS

- Review Market Landscape, Competitor, ICP, and CSP outputs with manager
- Finalize the Week 2 target lead list
- Submit first Weekly Report using the Chapter 16 template

DELIVERABLE

Week 1 report + finalized Week 2 target list

EXPECTED OUTCOME

Manager sign-off to begin active outreach

TOOLS

CRM, Weekly Report template

KPI

1 weekly report submitted · EST. TIME 4 hrs

Week 2 — Lead Generation & Outreach Launch

DAYS 8-14

Day 8

LEAD SCRAPING I

OBJECTIVE

Generate the first qualified lead batch from LinkedIn.

TASKS

- Run 3 LinkedIn Sales Navigator searches against ICP criteria
- Export and clean the results
- Score every lead against the ICP rubric

DELIVERABLE

50 scored leads in CRM

EXPECTED OUTCOME

A live, qualified top-of-funnel list to work from

TOOLS

LinkedIn Sales Navigator, CRM

KPI

50 leads scraped, 100% scored · EST. TIME 6 hrs

Day 9

OBJECTIVE

Expand sourcing into CSPs and directories.

TASKS

- Scrape 15 additional CSP contacts from the Day 5 master list
- Cross-check against Google Maps and business directories
- Enrich records with verified emails

DELIVERABLE

15 CSP contacts enriched and verified

EXPECTED OUTCOME

Channel-partner outreach list ready to launch

TOOLS

Apollo, Clay, Google Maps

KPI

15 CSP contacts enriched · EST. TIME 5 hrs

Day 10

OBJECTIVE

Send the first wave of qualified outreach.

TASKS

- Draft 2 outreach templates (direct-enterprise and CSP-partnership)
- Send first 20 personalized messages/emails
- Log every send in the CRM with a follow-up date

DELIVERABLE

20 outreach messages sent and logged

EXPECTED OUTCOME

First responses begin arriving; outreach engine is live

TOOLS

LinkedIn, Gmail/Outlook, CRM

KPI

20 sends, <24hr logging · EST. TIME 5 hrs

Day 11

OBJECTIVE

Nurture non-responders and warm early replies.

TASKS

- Send follow-up #1 to Day 10 non-responders
- Respond to any inbound replies within 4 hours
- Add 2 new prospects to the grooming (nurture) track

DELIVERABLE

Follow-up sequence logged; replies actioned same-day

EXPECTED OUTCOME

No lead goes cold from a missed follow-up

TOOLS

CRM, Gmail/Outlook

KPI

100% same-day reply rate · EST. TIME 4-5 hrs

OBJECTIVE

Sustain the sourcing engine at a repeatable weekly pace.

TASKS

- Scrape 30 additional leads across 2 new search segments
- Score and route into CRM
- Flag any leads matching an active discovery conversation's referral network

DELIVERABLE

30 additional scored leads

EXPECTED OUTCOME

Pipeline top-of-funnel stays consistently replenished

TOOLS

LinkedIn Sales Navigator, Apollo, CRM

KPI

30 leads scraped · EST. TIME 5 hrs

OBJECTIVE

Prepare for the first live discovery call.

TASKS

- Select the strongest responder for a discovery call
- Build the discovery question set and client research brief (Chapter 9)
- Confirm meeting logistics and internal attendee if needed

DELIVERABLE

Discovery call brief for 1 confirmed meeting

EXPECTED OUTCOME

Walk into the first call fully prepared, not cold

TOOLS

CRM, client research (LinkedIn, company site)

KPI

1 discovery call booked · EST. TIME 4 hrs

OBJECTIVE

Assess outreach performance and refine targeting.

TASKS

- Calculate response rate from Week 2 sends
- Identify which message angle performed best
- Submit Weekly Report and adjust Week 3 outreach volume target

DELIVERABLE

Week 2 report with response-rate analysis

EXPECTED OUTCOME

Data-informed adjustment to outreach approach for Week 3

TOOLS

CRM, Weekly Report template

KPI

Response rate calculated and reported · EST. TIME 4 hrs

OBJECTIVE

Run the first live discovery call and extract a real requirement set.

TASKS

- Conduct the discovery call using the Chapter 9 question set
- Take structured notes in real time
- Distribute meeting notes within 24 hours

DELIVERABLE

Completed discovery notes + stakeholder map

EXPECTED OUTCOME

A clear picture of the client's actual need, budget signal, and timeline

TOOLS

Video call platform, CRM, Meeting Notes template

KPI

1 discovery call completed, notes shared <24hrs · EST. TIME 4 hrs

OBJECTIVE

Turn discovery notes into a structured scope.

TASKS

- Draft the Business Requirement Document (Chapter 19 template)
- Identify which internal teams need to be looped in
- Flag any risks or open questions for the client

DELIVERABLE

1 completed Business Requirement Document

EXPECTED OUTCOME

Internal teams have what they need to scope effort and cost

TOOLS

BRD template, Google Docs/Notion

KPI

1 BRD completed · EST. TIME 5 hrs

OBJECTIVE

Loop in Creative, Development, and Leadership for the active opportunity.

TASKS

- Share the BRD with relevant internal leads
- Run a short internal alignment meeting
- Capture resourcing and feasibility input

DELIVERABLE

Internal alignment notes + resourcing input

EXPECTED OUTCOME

No surprises later – the whole team is aligned before the pitch

TOOLS

Slack/Teams, internal meeting

KPI

1 internal alignment meeting held · EST. TIME 3 hrs

OBJECTIVE

Build the tailored pitch deck for the active opportunity.

TASKS

- Select relevant case studies for this client's industry
- Customize the capability deck to their specific requirement
- Draft a first-pass ROI/value-proposition narrative

DELIVERABLE

Tailored pitch deck, draft 1

EXPECTEDOUTCOME

A pitch deck specific to this client, not a generic template

TOOLS

Presentation software, case study library

KPI

1 deck drafted · EST. TIME 5-6 hrs

OBJECTIVE

Keep the sourcing engine running in parallel with active deal work.

TASKS

- Scrape 25 new leads
- Send 15 fresh outreach messages
- Follow up on all outstanding Week 2 sends

DELIVERABLE

25 leads scraped, 15 new sends, all follow-ups actioned

EXPECTEDOUTCOME

Pipeline continues to grow even while a deal is in motion

TOOLS

LinkedIn Sales Navigator, Apollo, CRM

KPI

25 leads / 15 sends · EST. TIME 5 hrs

OBJECTIVE

Deliver the pitch and handle first-round objections.

TASKS

- Deliver the pitch presentation to the client
- Log objections and questions raised in real time
- Send a same-day recap email with next steps

DELIVERABLE

Pitch delivered + objection log + recap email sent

EXPECTEDOUTCOME

Client has a clear next step and a reason to say yes

TOOLS

Presentation software, video call platform, CRM

KPI

1 pitch delivered, recap sent same day · EST. TIME 4 hrs

OBJECTIVE

Assess deal momentum and refine the pitch based on real objections.

TASKS

- Review the objection log with the team
- Update the pitch deck template with responses to common objections
- Submit Weekly Report

DELIVERABLE

Updated objection-handling notes + Week 3 report

EXPECTED OUTCOME

The next pitch is measurably stronger than this one

TOOLS

CRM, Weekly Report template

KPI

Objection log reviewed and actioned · EST. TIME 4 hrs

Week 4 — Proposals, Pipeline Mastery & Reporting Rhythm

DAYS 22-30

OBJECTIVE

Convert pitch alignment into a formal proposal.

TASKS

- Draft scope of work, deliverables, and timeline
- Draft pricing based on the resourcing plan from Day 17
- Route the draft for internal review

DELIVERABLE

Proposal draft 1

EXPECTED OUTCOME

A proposal grounded in real discovery and internal sign-off, not guesswork

TOOLS

Proposal template, Google Docs/Notion

KPI

1 proposal drafted · EST. TIME 5-6 hrs

OBJECTIVE

Finalize and send the proposal.

TASKS

- Incorporate internal review feedback
- Finalize pricing and terms with leadership sign-off
- Send the proposal to the client with a clear response deadline

DELIVERABLE

Final proposal sent

EXPECTED OUTCOME

The opportunity formally enters the Proposal stage of the pipeline

TOOLS

Proposal template, CRM

KPI

1 proposal sent · EST. TIME 4 hrs

Day 24

CRM & PIPELINE AUDIT

OBJECTIVE

Run a full audit of every opportunity currently in the pipeline.

TASKS

- Review every open deal for correct stage, next action, and owner
- Flag and re-engage any deal stalled 10+ days
- Clean up duplicate or dead records

DELIVERABLE

Clean, fully audited pipeline

EXPECTED OUTCOME

Pipeline reporting reflects reality, not stale assumptions

TOOLS

CRM

KPI

100% of open deals audited · EST. TIME 4 hrs

Day 25

SOURCING SPRINT

OBJECTIVE

Push a larger sourcing sprint to build a second-deal pipeline.

TASKS

- Scrape 40 new leads across 2 fresh ICP segments
- Send 20 new outreach messages
- Add 5 CSP partnership follow-ups

DELIVERABLE

40 leads scraped, 20 sends, 5 CSP follow-ups

EXPECTED OUTCOME

A second wave of pipeline building behind the first deal

TOOLS

LinkedIn Sales Navigator, Apollo, CRM

KPI

40 leads / 20 sends · EST. TIME 6 hrs

Day 26

NEGOTIATION SUPPORT

OBJECTIVE

Support the negotiation stage on the active proposal.

TASKS

- Prepare answers to anticipated pricing/scope objections
- Join or support the negotiation call
- Log every change requested by the client

DELIVERABLE

Negotiation notes + updated proposal terms if needed

EXPECTED OUTCOME

Deal moves toward Closed Won with all changes tracked

TOOLS

CRM, Proposal template

KPI

Negotiation call logged · EST. TIME 3-4 hrs

OBJECTIVE

Systematically clear the follow-up backlog across the full pipeline.

TASKS

- Review every open commitment across all active deals
- Send outstanding follow-ups
- Reschedule or close out any deal with no realistic path forward

DELIVERABLE

Zero overdue follow-ups

EXPECTED OUTCOME

No opportunity dies from neglect

TOOLS

CRM

KPI

0 overdue follow-ups · EST. TIME 4 hrs

OBJECTIVE

Run through each SOP in Chapter 17 once, end to end, from memory.

TASKS

- Self-audit against the Lead Scraping SOP
- Self-audit against the Discovery Call SOP
- Self-audit against the Proposal Creation SOP

DELIVERABLE

Self-audit checklist completed for 3 SOPs

EXPECTED OUTCOME

Core processes are second nature, not something you look up

TOOLS

This manual, CRM

KPI

3 SOPs self-audited · EST. TIME 3 hrs

OBJECTIVE

Assemble the data for the first Monthly Review.

TASKS

- Pull pipeline, lead-quality, and conversion data for the month
- Draft the Monthly Review document (Chapter 16)
- Identify 2-3 concrete improvements for next month

DELIVERABLE

Monthly Review draft

EXPECTED OUTCOME

A clear, data-backed view of first-month performance

TOOLS

CRM, Monthly Review template

KPI

1 monthly review drafted · EST. TIME 5 hrs

OBJECTIVE

Close the onboarding month and set the operating rhythm going forward.

TASKS

- Present the Monthly Review to your manager
- Agree on Month 2 targets and any process adjustments
- Confirm your ongoing daily/weekly/monthly checklist rhythm (Chapter 15)

DELIVERABLE

Signed-off Monthly Review + Month 2 targets

EXPECTED OUTCOME

You are now operating independently on the standard rhythm

TOOLS

CRM, Monthly Review template

KPI

Month 2 targets agreed · EST. TIME 3 hrs

CHAPTER TAKEAWAYS

- Weeks build in a fixed sequence: Foundation → Sourcing → Discovery/Pitch → Proposal/Pipeline mastery.
- Every day produces one named deliverable — if there's no deliverable, the day isn't done.
- By Day 30 you should be running the full daily/weekly/monthly rhythm in Chapters 15-16 without guidance.

The Lead Generation Process

Finding a name is the easy part. The process below is what turns a name into a lead worth your time.

Where to find leads

Start from the sources in Chapter 8, but always start with intent: define the ICP segment you're targeting *before* opening a search tool, not after. A search run with a clear filter (e.g. "CSPs in DIFC with 10-50 employees") produces a usable list; a search run with "anyone in Dubai business services" produces noise.

How to scrape leads

- . Define the segment and search filters (industry, geography, company size, title).
- . Run the search in LinkedIn Sales Navigator or the relevant directory.
- . Export or manually capture: name, title, company, LinkedIn URL, company size, and any visible buying signal.
- . Pass the export through the enrichment tool (Apollo/Clay) to append verified email and phone where available.
- . Import into the CRM using the standard field mapping (see the Lead Scraping SOP, Chapter 17).

How to qualify leads

Score every lead against the ICP rubric (Chapter 7) on a simple scale. A lead qualifies for active outreach only if it clears the minimum bar on **all three** of: company fit, decision-maker access, and a plausible near-term trigger (e.g. recently announced Dubai expansion, new office listing, recent funding).

How to enrich leads

Enrichment means adding the context that makes a first message land: recent company news, the contact's recent LinkedIn activity, mutual connections, and — for CSPs — their visible client portfolio. Five minutes of enrichment per lead is standard before any outreach is sent.

How to groom leads

A qualified lead that isn't ready now doesn't get dropped — it gets groomed: added to a light-touch nurture cadence (a relevant article, a congratulations on a company milestone, an event invite) roughly every 2-3 weeks, with a note in the CRM on what would trigger re-engagement.

How to verify contacts

Before any outreach is sent, verify that the email is deliverable (via the enrichment tool's verification status) and that the contact still holds the title/role recorded — titles on LinkedIn can be stale by months.

How to prioritize prospects

Prioritize on two axes: **fit** (how closely they match the ICP) and **timing** (how likely they are to have an active or near-term need). A high-fit, high-timing lead is worked same-day; a high-fit, low-timing lead goes to grooming; a low-fit lead is logged but not actively worked.

How to segment leads

Segment every lead into one of two tracks — **Direct Enterprise** or **Channel Partner (CSP)** — because the qualification criteria, messaging, and sales cycle differ meaningfully between the two (see Chapter 7 for both ICPs).

How to assign scores

SCORE	BAND	CRITERIA	ACTION
Hot (8-10)		Strong ICP fit + confirmed decision-maker + active trigger	Outreach same day
Warm (5-7)		Good ICP fit, trigger unconfirmed or decision-maker unclear	Outreach within the week; identify decision-maker
Nurture (2-4)		Fits ICP loosely or timing is clearly early	Add to grooming cadence
Disqualified (0-1)		Does not meet minimum ICP criteria	Log and close — do not pursue

How to identify decision makers

For Direct Enterprise leads, the relevant titles are typically Regional/Country Manager, Head of Marketing, Marketing Director, or the founder in smaller entities. For CSP leads, target the Managing Partner, Business Development Director, or Client Relations Lead — the people who control which vendors get referred to incoming clients.

How to identify buying signals

- A new office/branch announcement or job postings for a new Dubai location
- Recent trade license or free-zone registration activity
- A CSP publicly onboarding a new corporate client
- Leadership hires in a market-facing role (Country Manager, Regional Director)
- A visibly outdated or missing website/brand presence for a company that has clearly just launched locally

WATCH FOR

Volume without signal is the most common scraping mistake. A list of 200 companies "in Dubai" with no buying signal attached will convert far worse than 40 companies with a real trigger. Always scrape for the signal, not just the segment.

Ideal Customer Profile (ICP)

Two ICPs, not one: the Direct Enterprise buyer, and the Channel Partner (CSP) who refers them.

ICP 1 — Direct Enterprise Buyer

Attribute	Profile
Company size	50-2,000 employees globally; 1-30 employees at the new Dubai/GCC office
Revenue	Mid-market to large enterprise — typically USD 10M+ annual revenue
Industry	Professional services, technology, fintech, retail/e-commerce, logistics, hospitality
Geography	Actively opening or having recently opened a Dubai/UAE/GCC office
Decision makers	Regional/Country Manager, Head of Marketing, Marketing Director, or Founder
Pain points	No local marketing/creative bench; unfamiliar with the local market; needs to launch fast without hiring a full local team
Budget	Has allocated (or can quickly allocate) a market-entry marketing budget
Growth stage	Actively expanding — this is a growth-stage or scale-stage decision, not early-stage bootstrapping
Technology stack	Has core business systems in place; typically lacks marketing/martech tooling for the new market
Marketing maturity	Marketing-mature in their home market, marketing-immature locally
Likelihood to buy	High when a trigger (Chapter 6) is present and a decision-maker is reachable within 2-3 touches

ICP 2 — Channel Partner (Corporate Service Provider)

Attribute	Profile
Company size	5-100 employees
Revenue	Varies — fit is driven by client volume, not CSP revenue
Industry	Business setup consulting, free-zone company formation, corporate services
Geography	Dubai and wider UAE, with GCC-wide client bases
Decision makers	Managing Partner, Business Development Director, Client Relations Lead
Pain points	No in-house marketing/technology team; clients ask for referrals they can't currently provide
Budget	N/A directly — the CSP refers budget rather than spending it, though co-marketing budget may exist
Growth stage	Established, steady client flow — value is in volume of referrals, not size of the CSP itself
Technology stack	Typically light — CRM and basic compliance tooling only
Marketing maturity	Low to moderate for their own marketing; this is not the fit criterion that matters
Likelihood to buy	The "buy" here is partnership commitment, not a single deal — evaluate on willingness to formalize a referral relationship

PLAYBOOK NOTE

A CSP with a smaller client base but a genuinely engaged Managing Partner will outperform a larger CSP that treats the conversation as a favor. Weight relationship commitment as heavily as company size when qualifying channel partners.

CHAPTER TAKEAWAYS

- Score every lead against the correct ICP — Direct Enterprise and Channel Partner are evaluated differently.
- Direct Enterprise fit hinges on trigger + reachable decision-maker; CSP fit hinges on client volume + partnership

willingness.

- Refresh both ICPs quarterly based on which qualified leads actually converted.

Lead Sources

Twenty channels, three tiers of priority. Work the top tier daily; the rest weekly or opportunistically.

Tier 1 — Primary, worked daily

SOURCE	USE IT FOR
LinkedIn / Sales Navigator	Direct enterprise decision-makers and CSP leadership — the single highest-yield source
Apollo	Bulk contact enrichment and verified email/phone appending
Clay	Multi-source enrichment workflows and signal-based list building
Referrals	Warm introductions from existing clients or partners — highest conversion rate of any source

Tier 2 — Secondary, worked weekly

SOURCE	USE IT FOR
ZoomInfo	Firmographic data and org-chart mapping for larger enterprise targets
Lusha	Contact verification and phone number appending
Crunchbase	Identifying recently funded or expanding companies
Google Maps	Locating physically established CSPs and local businesses by free zone/district
Google Search	News-based triggers — office openings, leadership hires, expansion announcements
Business Directories	Broad CSP and consultant discovery
Dubai Chamber	Verified member companies and formal introductions
Free Zone Listings	Newly registered entities by free zone — a direct trigger source
Corporate Service Providers	Both a target segment and, once converted, a lead source in their own right

Tier 3 — Opportunistic

SOURCE	USE IT FOR
Networking Events	Face-to-face access to CSPs and enterprise decision-makers
Meetup	Community and industry-specific gatherings
Luma	Curated startup/business events, particularly in tech and creative sectors
Eventbrite	Broader business and trade event discovery
Industry Associations	Sector-specific access and credibility signals
Cold Outreach	Direct email/LinkedIn to unqualified-but-plausible targets, used sparingly
Partnerships	Co-marketing or referral arrangements with adjacent service providers (legal, banking, relocation)

PLAYBOOK NOTE

Referrals convert at multiples of any cold source. Every closed-won client and every active CSP partner should be asked, explicitly, for one introduction per quarter — this is a standing task, not a one-time ask.

The Discovery Process

Discovery is where a proposal either gets grounded in reality or gets built on guesses. Never skip it, and never wing it.

How to prepare

- Complete client research (company, leadership, recent news, existing digital presence)
- Review the CRM for any prior touchpoints with this contact or company
- Select and adapt the standard question set below to what you already know
- Confirm who from the client side will attend, and whether they're the actual decision-maker

Questions to ask

Pain point discovery

- "What's driving the need to move on this now, rather than in six months?"
- "What have you tried already, and what happened?"
- "If nothing changes, what does that cost you?"

Business analysis

- "Walk me through what a successful local launch looks like for you in 90 days."
- "Who else in the business is affected by this decision?"

Requirement gathering

- "What existing brand assets, guidelines, or content do you already have?"
- "What channels matter most for your customers here — website, social, paid, direct sales?"

Budget qualification

- "Has a budget already been allocated for this, or is that still being defined?"
- "How does spend typically get approved on your side — is there a threshold that needs sign-off above your level?"

Timeline qualification

- "Is there a hard date this needs to be live by — a launch event, an office opening, a board update?"

Stakeholder mapping

- "Besides yourself, who needs to be comfortable with this decision before it moves forward?"

Risk identification

- "What's the biggest thing that could get in the way of this moving forward on your end?"

Next steps

Every discovery call ends with an explicit, mutually agreed next step and date — never "we'll be in touch." Confirm it verbally on the call, then repeat it in the follow-up email the same day.

TEMPLATE REFERENCE

Use the Discovery Notes template in Chapter 19 to capture this call. It maps directly onto the Business Requirement Document, so notes taken well here save an hour of rework later.

CHAPTER TAKEAWAYS

- Prepare before every call – client research plus a tailored question set, never generic.
- Cover pain point, business context, requirements, budget, timeline, stakeholders, and risk – in that order.
- Every call ends with a concrete next step and date, confirmed in writing the same day.

The Client Pitch Process

The pitch is where discovery becomes a recommendation. It should feel tailored, because it is.

What to prepare

COMPONENT	PURPOSE
Executive Presentation	The top-line narrative: their situation, our recommendation, the outcome
Capability Deck	Proof of what we can deliver – the four talent clusters, relevant to their scope
Case Studies	1-2 relevant prior engagements, ideally in an adjacent industry or a similar market-entry situation
Pricing Strategy	Framed around the managed-service model, not a per-head rate card
Talent Allocation	Which roles, at what capacity, doing what – mapped directly to their BRD
Timeline	Milestone-based, tied to their stated launch date where one exists
Roadmap	What happens after the initial engagement – the growth path
ROI	Framed against the cost and risk of building an equivalent local team from scratch
Value Proposition	Senior oversight, simplified compliance, speed to launch – stated explicitly, not implied
Competitive Advantage	Why this beats hiring individually, using a staffing vendor, or a generic agency

Delivering the pitch

- . Open by playing back their situation in their own words – this confirms you listened in discovery.
- . Present the recommendation as a direct answer to what they told you, not a generic capability tour.
- . Address budget and timeline explicitly rather than waiting for them to ask.
- . Close with a specific, dated next step.

WATCH FOR

Never present a capability deck that wasn't customized to this client's discovery notes. A generic deck is the fastest way to lose credibility built in discovery – it signals that the earlier conversation didn't actually shape anything.

The Proposal Creation Process

A proposal is a contract's first draft. Treat every line as something you'd be comfortable being held to.

SECTION	WHAT IT MUST CONTAIN
Scope of Work	Exactly what will be delivered, stated specifically enough that "done" is unambiguous
Deliverables	Named outputs (e.g. "brand identity system," "5-page website," "3 months of social content") not vague categories
Timeline	Milestone dates, tied to any hard deadline surfaced in discovery
Pricing	Structured around the managed-service model; broken out by phase if the engagement has distinct phases
Resource Plan	Which talent clusters and approximate capacity are allocated
Responsibilities	What DECHUB BRIDGE owns vs. what the client must provide (brand assets, approvals,
Assumptions	Anything the pricing/timeline depends on – number of revision rounds, response times for approvals, etc.
Success Metrics	How both sides will know the engagement is working
Terms	Payment schedule, engagement length, termination/renewal terms

PLAYBOOK NOTE

Every proposal should route through internal review before it's sent — Sales/Leadership for pricing and terms, and the relevant delivery lead for scope feasibility. A proposal sent without this review is the most common source of over-promised scope.

The Sales Pipeline

Nine stages. Every open opportunity sits in exactly one, with a named next action.

STAGE	DEFINITION	EXIT CRITERIA
Prospect	Identified and scored, not yet contacted	First outreach sent
Qualified Lead	Responded and confirmed against ICP criteria	Discovery call scheduled
Discovery	Discovery call completed, BRD in progress	BRD finalized and internally aligned
Proposal	Proposal sent, awaiting response	Client responds with feedback, approval, or rejection
Negotiation	Terms, scope, or pricing under active discussion	Terms agreed by both sides
Closed Won	Contract signed	Handed to Onboarding
Closed Lost	Opportunity did not convert	Loss reason logged; added to long-term nurture if appropriate
Onboarding	Contract signed, delivery team standing up the engagement	Engagement live and delivering
Account Growth	Active client being evaluated for expanded scope	New opportunity opened, or account maintained at current scope

WATCH FOR

A deal with no stage movement in 10+ business days is stalled, not "still in progress." Flag it in your weekly report rather than letting it sit — a stalled deal that's re-engaged early is often recoverable; one that's ignored for a month usually isn't.

Internal Coordination

You are the connective tissue between the market and the people who deliver the work. Loop teams in early, not after a commitment is already made to the client.

TEAM	WHEN YOU LOOP THEM IN	WHAT YOU NEED FROM THEM
Sales	Any qualified lead entering active pipeline	Pricing guidance, deal strategy, negotiation support
Marketing	Ongoing — case studies, positioning updates, content for outreach	Up-to-date collateral and messaging
Creative Team	Once BRD is drafted, before the pitch	Feasibility input and creative direction for the proposal
Developers	Once technical scope is identified in discovery	Feasibility and effort estimates
Designers	Once BRD is drafted	Effort estimates and portfolio pieces for the pitch
Project Managers	At Closed Won	Smooth handoff into Onboarding
Leadership	Any proposal with non-standard pricing or terms; any stalled high-value deal	Approval and escalation support
Finance	At proposal stage for pricing/terms sign-off; at Closed Won for invoicing setup	Terms validation and billing setup
Operations	At Onboarding	Resourcing confirmation and delivery kickoff

PLAYBOOK NOTE

The rule of thumb: loop a team in the moment their input could still change the outcome, not after you've already told the client something that depends on their answer.

A simple RACI for the deal lifecycle

Use this as a quick check whenever you're unsure who owns what at a given stage. R = Responsible (does the work), A = Accountable (owns the outcome), C = Consulted, I = Informed.

ACTIVITY	BUSINESS ANALYST	SALES	DELIVERY LEAD	LEADERSHIP
Lead sourcing & qualification	R / A	C	—	I
Discovery & BRD	R / A	C	C	I
Pitch delivery	R	A	C	I
Proposal pricing & terms	R	C	C	A
Negotiation	C	A / R	I	C
Delivery handoff	R	I	A	I

Why this matters day to day

Most internal friction in this role doesn't come from disagreement — it comes from ambiguity about who was supposed to weigh in before a client heard something. The RACI above exists to remove that ambiguity before it costs you a client's confidence. When a new situation doesn't map cleanly onto the table, default to over-communicating rather than assuming silence means approval.

KPIs & Targets

What gets measured daily keeps the pipeline honest. These are the numbers you should always be able to state without opening the CRM.

Daily KPIs

LEADS SCRAPED

15-30

Scored and entered into CRM same day

OUTREACH SENT

10-20

Personalized, not templated blasts

REPLY TIME

< 4 hrs

On any inbound response

Weekly KPIs

QUALIFIED LEADS

8-12

Scored Hot or Warm, added to active pipeline

DISCOVERY CALLS

2-4

Completed with notes distributed within 24 hrs

RESPONSE RATE

> 15%

Of total outreach sent that week

Monthly KPIs

PROPOSALS SENT

3-6

Grounded in a completed BRD

PIPELINE VALUE

Growing

Month-over-month, tracked in CRM

CSP PARTNERSHIPS

1-2 new

Formalized referral relationships

Quarterly KPIs

CLOSED WON

Trending up

Deals converted, tracked against prior quarter

CONVERSION RATE

Improving

Qualified lead to Closed Won

ICP ACCURACY

Reviewed

ICP refined based on which leads actually converted

Daily & Weekly Checklists

The operating rhythm you should be running on by Day 30, every single working day.

Daily Checklist

Morning

- ☐ Review CRM for overnight replies and overdue follow-ups
- ☐ Check calendar and prepare for any calls scheduled today
- ☐ Set today's outreach and scraping targets against the KPIs in Chapter 14

Afternoon

- ☐ Execute scraping and outreach in a focused block
- ☐ Conduct any scheduled discovery or pitch calls
- ☐ Update CRM stages and next actions for every opportunity touched today

Evening

- ☐ Distribute meeting notes for any calls held today, if not already sent
- ☐ Clear or reschedule any follow-ups due today
- ☐ Complete End-of-Day Reporting (below)

End-of-Day Reporting

A short, structured log — leads added, outreach sent, calls held, deals moved — recorded in the CRM or shared tracker so that weekly reporting is a summary of real-time data, not a reconstruction from memory.

Weekly Checklist

DAY	FOCUS
Monday	Review pipeline from Friday's close-out; set the week's scraping and outreach targets
Tuesday	Heavy sourcing and outreach day; clear weekend inbound
Wednesday	Discovery calls and BRD work prioritized
Thursday	Pitch and proposal work prioritized; internal stakeholder coordination
Friday	Follow-up sweep, CRM cleanup, Weekly Review, submit Weekly Report

Weekly Review

Every Friday: reconcile the week's KPI actuals against target, identify any stalled deals, and set next week's priorities before logging off. This should never spill into Monday morning.

Monthly Review

A once-a-month step back from execution to ask whether the process itself needs to change.

What the Monthly Review covers

- **Pipeline Analysis** — total pipeline value, movement by stage, and stalled-deal count versus last month
- **Lead Quality** — the proportion of scraped leads scoring Hot/Warm versus Nurture/Disqualified, by source
- **Conversion Rates** — lead-to-discovery, discovery-to-proposal, and proposal-to-close rates, tracked over time
- **Meetings** — total discovery calls and pitches held, and how they compare to target
- **Revenue Contribution** — value of Closed Won opportunities originated this month
- **Improvements** — 2-3 concrete process changes to make next month, based on the data above
- **Lessons Learned** — what worked, what didn't, and why — captured honestly, not just the wins

TEMPLATE REFERENCE

Use the Monthly Report template in Chapter 19. The Weekly Report template feeds directly into it — four completed weekly reports should give you most of the raw data you need.

Standard Operating Procedures

Nine SOPs for the tasks you'll repeat most often. Follow them exactly until you have enough experience to know when an exception is genuinely warranted.

SOP — Lead Scraping

- . Define the ICP segment and search filters before opening any tool.
- . Run the search in LinkedIn Sales Navigator (primary) or the relevant directory.
- . Export results and pass through the enrichment tool for verified contact details.
- . Import into CRM with complete standard fields — no partial records.
- . Score every record before moving to the next batch.

SOP — Lead Qualification

- . Apply the ICP scoring rubric (Chapter 7) to every new lead within 24 hours of entry.
- . Confirm decision-maker access and a plausible trigger before assigning Hot/Warm status.
- . Route Hot leads to same-day outreach; Warm to within-the-week; Nurture to the grooming cadence.

SOP — CRM Updates

- . Update stage, next action, and owner immediately after any client or internal interaction.
- . Never leave a "next action" field blank — every open deal has a named next step.
- . Run a full pipeline audit weekly (Friday) to catch anything missed in real time.

SOP — Discovery Calls

- . Complete client research and prepare a tailored question set beforehand.
- . Take structured notes live using the Discovery Notes template.
- . Confirm a specific next step and date before the call ends.
- . Distribute notes within 24 hours.

SOP — Meeting Notes

- . Capture attendees, key points, decisions, and action items during the meeting, not after.
- . Distribute to all attendees and relevant internal stakeholders within 24 hours.
- . Log any action items as follow-ups in the CRM with an owner and date.

SOP — Proposal Creation

- . Draft from a completed BRD only — never from discovery notes alone.
- . Route for internal review (Sales and relevant delivery lead) before sending.
- . Send with a clear response deadline and log the send in CRM.

SOP — Follow-ups

- . Every commitment made in a meeting or email gets a CRM follow-up entry the same day.
- . Review the full follow-up list every morning; action or reschedule anything due.
- . Nothing sits overdue longer than 48 hours without a deliberate reason logged.

SOP — Client Handover

- . At Closed Won, compile the BRD, proposal, and all discovery/pitch notes into a single handover packet.
- . Brief the assigned Project Manager directly — do not rely on the packet alone.

- . Confirm the client has a clear point of contact and expected next milestone before disengaging.

SOP — Escalation Process

- . Any deal stalled 10+ business days gets flagged to your manager in that week's report at minimum.
- . Any non-standard pricing, scope, or terms request goes to Leadership before it's communicated to the client.
- . Any client complaint or risk signal is escalated the same day it's identified — never held for the weekly report.

Recommended Tool Stack

The tools this role runs on daily, grouped by function.

CATEGORY	TOOLS	PRIMARY USE
CRM	Your team's designated CRM platform	System of record for every lead, deal, and interaction
Lead Generation	LinkedIn Sales Navigator, Apollo, Clay, ZoomInfo, Lusha	Sourcing and enriching prospects
Email	Gmail / Outlook	Outreach and client correspondence
Presentation	Google Slides / PowerPoint / Canva	Capability decks and pitch materials
Project Management	Notion / Asana / Monday.com	Internal task and deal tracking alongside the CRM
Communication	Slack / Microsoft Teams	Internal stakeholder coordination
AI Tools	Claude and equivalent assistants	Research synthesis, drafting, and document preparation
Automation	Zapier / Make	Connecting CRM, email, and enrichment tools
Research	Google Search, Crunchbase, Dubai Chamber, company websites	Market, competitor, and client research
Analytics	CRM reporting dashboards, spreadsheets	KPI tracking and reporting

Template Library

Ten editable templates. Use them as-is until you've earned the judgment to know when a field genuinely doesn't apply.

TEMPLATE — LEAD TRACKER

Company · Contact Name · Title · Segment (Direct/CSP) · Source · Score · Status · Next Action · Owner · Last Touch Date

TEMPLATE — DISCOVERY NOTES

Client & Attendees · Date · Pain Points · Business Context · Requirements · Budget Signal · Timeline · Stakeholders · Risks · Agreed Next Step & Date

TEMPLATE — MEETING MINUTES

Meeting Purpose · Attendees · Key Discussion Points · Decisions Made · Action Items (Owner + Date) · Next Meeting

TEMPLATE — BUSINESS REQUIREMENT DOCUMENT (BRD)

Client Overview · Objective · Scope (In/Out) · Deliverables · Constraints · Existing Assets · Success Metrics · Open Questions

TEMPLATE — STRATEGY PLANNING DOCUMENT

Opportunity Summary · Why This Client, Why Now · Recommended Approach · Resourcing Implications · Risks · Internal Owner

TEMPLATE — PROPOSAL CHECKLIST

Scope confirmed against BRD ☐ Pricing reviewed by Finance/Leadership ☐ Delivery feasibility confirmed ☐ Terms reviewed ☐ Response deadline set ☐

TEMPLATE — CLIENT FOLLOW-UP TRACKER

Client · Commitment Made · Owner · Due Date · Status · Notes

TEMPLATE — WEEKLY REPORT

Leads Scraped/Qualified · Outreach Sent · Response Rate · Discovery Calls Held · Deals Moved by Stage · Stalled Deals · Blockers · Next Week's Priorities

TEMPLATE — MONTHLY REPORT

Pipeline Analysis · Lead Quality by Source · Conversion Rates · Meetings Held vs. Target · Revenue Contribution · Improvements for Next Month · Lessons Learned

TEMPLATE — PRESENTATION CHECKLIST

Deck customized to client's discovery notes ☐ Relevant case study selected ☐ Pricing section reviewed ☐ Timeline reflects client's stated deadline ☐ Recap email drafted and ready to send same-day ☐

Best Practices

The habits that separate a Business Analyst who produces activity from one who produces revenue.

Communication Guidelines

Every external message should be specific to the recipient — reference something real about their company, role, or situation. Generic outreach is the fastest way to be ignored or blocked.

Email Etiquette

- Subject lines state the value, not "Quick question" or "Following up"
- Keep first-touch emails under 120 words
- Always end with a single, clear, low-friction ask

Meeting Etiquette

- Join on time, camera on where the client's culture supports it
- Confirm the agenda in the first 60 seconds
- Never let a meeting end without a stated next step

Research Best Practices

Ten focused minutes of client research beats thirty unfocused minutes. Look specifically for: a recent trigger, a named decision-maker, and one detail you can reference to prove you did the homework.

Presentation Tips

Lead with their situation, not our capability list. A prospect wants to see themselves in the first three slides, not a company overview.

Client Handling

Set realistic expectations early — an over-promise in discovery becomes a delivery problem later, and it lands on someone else's desk. When in doubt, under-promise on timeline and over-deliver on communication.

Objection Handling

OBJECTION	RESPONSE DIRECTION
"We can just hire locally ourselves."	Compare timeline and compliance overhead of hiring versus a managed service that's live in weeks, not a quarter.
"This seems expensive versus a freelancer."	Reframe from day-rate to outcome: senior oversight, a full team, and simplified compliance included.

"We need to think about it."	Ask directly what specifically needs more thought – budget, scope, or timing – and address that one thing.
"We're also talking to another agency."	Ask what's most important in the comparison, then answer that directly rather than listing every differentiator.
"We don't have budget approved yet."	Offer to help build the internal business case – ROI framing, timeline risk of delay – rather than pausing the

	relationship.
"Can you start smaller, just one deliverable?"	Agree where it's genuinely workable, and frame it explicitly as a trial toward the fuller managed-service engagement.

Worked example — "We're also talking to another agency"

Client: "We're comparing you against another shop as well."

Response direction: "That's a fair thing to do for a decision like this — what's the main thing you're weighing between the two options?" Let them name the actual deciding factor (speed, price, portfolio, chemistry) before defending anything, then speak directly and only to that factor. Guessing at objections the client hasn't actually raised wastes the conversation.

Worked example — "We don't have budget approved yet"

Client: "This looks right, but I haven't got sign-off on spend yet."

Response direction: "Totally understand — would it help if I put together a short one-pager you could use internally, framing the cost of waiting against the cost of the engagement?" This keeps the deal moving by making the client's internal approval process easier, rather than treating the objection as a stall to wait out.

Time Management

Protect the morning block for sourcing and outreach — it's the task most easily crowded out by reactive work, and the one with the longest lead time before it pays off.

Prioritization

When in doubt, prioritize in this order: an overdue follow-up on an active deal, a scheduled call happening today, then new sourcing. Reactive commitments to existing relationships always outrank new volume.

Documentation Standards

If it isn't in the CRM or the shared document, it doesn't exist for reporting purposes — regardless of how well you remember it. Document as you go, not at the end of the day from memory.

Sample Scripts & Email Templates

Ready-to-adapt language for the four moments you'll face most often: first outreach to a CSP, first outreach to a direct enterprise, a discovery call opening, and a stalled-deal re-engagement.

EMAIL — FIRST OUTREACH TO A CORPORATE SERVICE PROVIDER

Subject: Marketing & design bench for your incoming clients

Hi [Name],

I imagine a good number of the companies you help set up locally ask you for a branding, website, or marketing contact the moment their license comes through. We run that layer for a handful of Dubai CSPs already — senior-led design, dev, and marketing delivery your clients can plug into without you having to build or vet a bench yourself.

Worth a short call to see if it's a fit for how [CSP Name] works with clients?

[Your name]

EMAIL — FIRST OUTREACH TO A DIRECT ENTERPRISE CONTACT

Subject: Marketing bench for the Dubai launch

Hi [Name],

Congrats on the [Dubai/UAE] expansion — saw [specific trigger, e.g. the new office listing / the recent hire]. Standing up local branding, a website, and a launch marketing plan is usually the first bottleneck at this stage, and building that team from scratch takes months you may not have.

We run a managed creative and marketing team — senior oversight included — that plugs in fast for exactly this kind of launch. Open to a 20-minute call this week to see if it's relevant?

[Your name]

CALL OPENING — DISCOVERY CALL

"Thanks for making time. Before I ask anything, here's what I already know from [source] — [one sentence reflecting their situation]. I want to make sure I've got that right, and then I'd like to understand what a successful local launch looks like for you in the next 90 days. Sound good?"

EMAIL — RE-ENGAGING A STALLED DEAL

Subject: Checking in on [Project/Company]

Hi [Name],

Wanted to check in — last we spoke, [specific detail from the last conversation]. Has anything changed on your end regarding timeline or priorities? Happy to pick back up whenever it makes sense, or to send over a quick summary of where things stood if that's useful in the meantime.

[Your name]

PLAYBOOK NOTE

Every bracketed field must be filled with something real before sending. A template with an unfilled placeholder is worse than no template — it signals exactly the generic, unresearched outreach this manual tells you to avoid in Chapter 20.

Glossary

Shared vocabulary so that "qualified," "hot," and "stalled" mean the same thing to everyone reading a report.

TERM	DEFINITION
ICP	Ideal Customer Profile — the defined criteria for who DECHUB BRIDGE sells to
CSP	Corporate Service Provider — a business-setup/free-zone consultant and our primary channel partner
BRD	Business Requirement Document — the structured scope produced after discovery
Trigger	A specific, timely signal that a prospect has an active or near-term need (Chapter 6)
Grooming	Light-touch nurture of a qualified-but-not-ready lead until timing improves
Hot / Warm / Nurture / Disqualified	The four lead-score bands defined in Chapter 6
Stalled deal	An opportunity with no stage movement for 10+ business days
Talent Layer	DECHUB BRIDGE' term for the managed, senior-overseen creative/marketing team a client plugs
Closed Won / Closed Lost	The two terminal pipeline stages — a signed contract, or a confirmed non-conversion
Account Growth	The pipeline stage for expanding scope with an existing, active client

Illustrative Case Studies

Two composite scenarios showing how the process in this manual plays out end to end. Use these as the shape of the story you tell in a pitch — substitute in real, current examples as they become available.

Scenario A — Direct Enterprise, market-entry launch

STAGE	WHAT HAPPENED
Source	Identified via a LinkedIn search for newly hired Country Managers with "UAE" in their title, cross-checked against a recent office-opening announcement
Qualification	Scored Hot — clear trigger, reachable decision-maker, budget signal in the job posting itself
Discovery	Call surfaced a hard launch-event deadline eight weeks out, no existing local brand assets, and a small internal team with no marketing background
Pitch	Presented a phased plan: brand identity and website in the first four weeks, launch content and paid support in the following four
Proposal & close	Proposal sent within three days of the pitch, terms agreed with one round of negotiation on payment schedule
Outcome	Engagement launched on time for the client's event; expanded into an ongoing retainer at the 90-day mark

Scenario B — Channel Partner, CSP referral relationship

STAGE	WHAT HAPPENED
Source	Identified from the CSP master list built in the Chapter 5 Day 5 exercise, ranked highly for client volume
Qualification	Managing Partner responsive and explicit about losing marketing-adjacent revenue to unaffiliated vendors
Discovery	Focused on their referral process rather than a single project — what they need to feel confident referring us
Pitch	Framed around making the CSP look good to their own clients, not around DECHUB BRIDGE' capability alone
Agreement	Formal referral relationship established, with a joint one-pager the CSP could hand directly to new clients
Outcome	Became a recurring lead source, producing several qualified Direct Enterprise leads in the following quarter

PLAYBOOK NOTE

Notice the shape: in both scenarios, the pitch reflected exactly what discovery surfaced. Neither scenario succeeded because of a stronger deck — both succeeded because the recommendation matched a real, specific situation.

Frequently Asked Questions

Questions a new Business Analyst tends to ask in the first few weeks, answered once here so you don't have to interrupt someone mid-deal to ask.

What if a lead doesn't clearly fit either ICP?

Score it against both profiles honestly. If it scores Nurture or below on both, log it and move on — not every plausible-looking company is worth active pursuit, and chasing borderline fits is the single biggest drag on a Business Analyst's effective capacity.

What if a CSP asks for exclusivity?

Do not agree to exclusivity terms on a call — this is a Leadership decision. Note the request, thank them for raising it, and bring it back internally before responding.

How many touches before I stop following up?

Five touches across roughly three weeks is the standard cadence for an unresponsive Hot or Warm lead before moving it to the grooming track rather than active outreach. Don't stop entirely — just change the tempo.

What if the client asks for a discount mid-pitch?

Don't negotiate live unless you have pre-approved room to do so. Acknowledge the request, confirm you'll follow up with options, and take it to Leadership rather than improvising terms in the room.

What if discovery reveals the client needs something we don't offer?

Say so directly rather than stretching the pitch to fit. Flag it internally — occasionally this is a capability gap worth discussing, but more often it simply means this isn't a fit, and saying so early protects the relationship for a future opportunity that is.

How do I handle a lead that came from an event, not a digital source?

Same process, different starting point: log them in the CRM immediately (ideally same day), source supplementary firmographic detail, score against the ICP, and route into the same qualification flow as any other lead.

What's the difference between "Qualified Lead" and "Discovery" stage?

Qualified Lead means they've responded and been confirmed against ICP criteria. Discovery means the actual discovery call has happened and a BRD is in progress. A lead that agrees to a call but hasn't had it yet stays in Qualified Lead, not Discovery.

Who do I ask when I'm not sure how to handle a specific client situation?

Default to your manager first for anything involving pricing, terms, or an unusual client request. For process questions covered in this manual, the relevant chapter's SOP (Chapter 17) should be your first stop before asking.

Sample Filled Reports

A worked example of a Weekly Report and a Monthly Report, using illustrative numbers, so the templates in Chapter 19 are never filled in blind.

Sample Weekly Report

FIELD	ENTRY
Week of	[Date range]
Leads scraped / qualified	78 scraped, 19 qualified (Hot: 6, Warm: 13)
Outreach sent	64 messages across LinkedIn and email
Response rate	17% (11 of 64)
Discovery calls held	3, all with notes distributed within 24 hours
Deals moved by stage	2 moved Qualified → Discovery; 1 moved Discovery → Proposal
Stalled deals flagged	1 — [Company], 12 days with no movement, re-engagement email sent Friday
Blockers	Awaiting Leadership sign-off on non-standard payment terms for [Company] proposal
Next week's priorities	Close out [Company] proposal review; launch outreach to newly scraped CSP segment

Sample Monthly Report

FIELD	ENTRY
Pipeline analysis	Total open pipeline up 22% month-over-month; 2 deals stalled 10+ days, both re-engaged
Lead quality by source	LinkedIn Sales Navigator: 34% Hot/Warm; Apollo-sourced: 21% Hot/Warm; CSP referrals: 61% Hot/Warm
Conversion rates	Lead-to-Discovery 24%; Discovery-to-Proposal 58%; Proposal-to-Close 41%
Meetings held vs. target	13 discovery calls held against a target of 12; 4 pitches delivered
Revenue contribution	1 Closed Won opportunity originated this month; 2 more in active Negotiation
Improvements for next month	Shift more sourcing time toward CSP referrals given materially higher lead quality; tighten the 5-touch follow-up cadence
Lessons learned	Generic LinkedIn Sales Navigator searches under-performed segment-specific searches by a wide margin — narrow the filters further next month

PLAYBOOK NOTE

Notice that the CSP-sourced leads in the sample above outperform every other source on quality. This is typical, not a fluke — it's the reason Chapter 2 treats the CSP channel as the primary opportunity rather than one source among many.

CSP Partnership One-Pager — Outline

The single document every CSP conversation should produce: something the CSP can literally hand to their next incoming client.

Structure

- . **Headline** — framed around the CSP's client, not DECHUB BRIDGE (e.g. "Your local launch team, ready from day one")
- . **The problem** — one line naming the gap: branding, website, and marketing capability that a newly set-up office doesn't have yet
- . **The offer** — the four talent clusters, described as outcomes rather than roles
- . **How it works** — a simple three-step process: introduction, scoping call, engagement kickoff
- . **Why it's low-risk** — the managed-service and compliance-simplification framing from Chapter 1, in plain language
- . **Contact** — a direct line to you, not a generic inbox

How to use it in the CSP relationship

The one-pager is not a brochure to leave behind after a meeting — it's the artifact that makes the referral easy for the CSP to make. Walk the Managing Partner or Business Development lead through exactly how they'd hand it to a client in a real conversation, and adjust the language until they say it sounds like something they'd actually send.

CHAPTER TAKEAWAYS

- The one-pager is written for the CSP's client, not for the CSP — it needs to be forwardable as-is.
- Test it by asking the CSP to imagine sending it to a real client, in front of you.

The Five-Touch Follow-Up Cadence

Referenced throughout this manual — here it is spelled out in full, touch by touch, for both segments.

Direct Enterprise cadence

TOUCH	TIMING	CHANNEL	PURPOSE
1	Day 0	LinkedIn or email	Initial outreach, trigger-specific (Chapter 21 template)
2	Day 3	Same channel	Brief bump — add one new piece of relevant value (a case study link, a specific insight)
3	Day 8	Opposite channel	Channel switch — if you opened on LinkedIn, follow up by email or vice versa
4	Day 14	Email	Direct, short: restate the one-line value proposition and ask for 15 minutes
5	Day 21	Email	Graceful close — signal you'll step back and invite them to reach out when timing is better; move to grooming

CSP Partnership cadence

TOUCH	TIMING	CHANNEL	PURPOSE
1	Day 0	LinkedIn or email	Initial outreach, framed around their client gap (Chapter 21 template)
2	Day 4	Same channel	Share a concrete example of the partnership model working elsewhere
3	Day 10	Phone or opposite channel	A direct call attempt where a number is available — CSPs respond well to a real conversation
4	Day 17	Email	Offer to send the one-pager (Chapter 26) with no further ask attached
5	Day 25	Email	Graceful close; move to grooming with a note to re-engage at the next relevant trigger

WATCH FOR

Do not compress this cadence to move faster — five touches spaced out consistently outperform five touches sent in a single week, which reads as pressure rather than persistence. Log every touch in the CRM the moment it's sent so the next touch date is never missed or duplicated.

The 90-Day Ramp: Months 2 and 3

The 30-Day Plan gets you operating independently. These two months turn that independence into a predictable, growing pipeline.

Month 2 focus — Consistency

AREA	TARGET
Sourcing volume	Sustain Week 4 pace: 25-40 leads scraped per week, every week
CSP partnerships	Move at least 2 CSP conversations from first contact to a formalized referral relationship
Pipeline hygiene	Zero deals stalled longer than 10 business days without an escalation note
Proposal quality	Every proposal grounded in a completed BRD — no exceptions, even under time pressure

Month 3 focus — Compounding

AREA	TARGET
Referral generation	Request one introduction from every Closed Won client and active CSP partner
ICP refinement	Complete the first quarterly ICP review (Chapter 7) using real conversion data from Months 1-3
Source optimization	Reallocate sourcing time toward whichever channel showed the highest Hot/Warm rate in the Monthly Reports
Account growth	Identify at least 1 existing client opportunity for expanded scope (Account Growth stage)

PLAYBOOK NOTE

Month 1 is about building the muscle. Months 2 and 3 are about noticing which parts of the muscle are strongest — which source, which segment, which pitch angle — and deliberately doing more of that, rather than treating every channel and segment as equally worth your time indefinitely.

Outreach & Data Handling Basics

Scraping and outreach at volume comes with real obligations. This is not optional reading.

What to keep in mind

- **Use business contact data for business purposes only.** Names, titles, and company emails gathered for B2B outreach should be used strictly for that outreach — not shared, resold, or repurposed.
- **Honor opt-outs immediately.** Any request to stop contact is actioned the same day, across every channel, and logged in the CRM so it isn't accidentally repeated by a future campaign.
- **Keep data accurate and current.** Remove or correct records you learn are wrong (a contact who has left the company, an incorrect title) rather than leaving stale data in the CRM.
- **Be mindful of regional data rules.** The UAE and GCC jurisdictions, and any client's home market, may have specific data protection requirements — when in doubt on a specific situation, ask Leadership rather than assuming.
- **Never scrape or store data you wouldn't be comfortable explaining the source of.** If a data source or method feels like it's skirting a platform's terms of service, don't use it — flag it to your manager instead.

WATCH FOR

Volume pressure is exactly when shortcuts happen — buying a questionable list, scraping a source that clearly restricts it, or ignoring an opt-out because it's inconvenient mid-cadence. None of these are worth the risk to the company's reputation or the partnerships this manual is built around. When in doubt, slow down and ask.

Capability Deck — Slide-by-Slide Outline

The default structure for the Executive Presentation referenced in Chapter 10. Customize the content on every slide to the specific client; never customize the order.

SLIDE	CONTENT
1 — Title	Client name, engagement focus, date — signals this deck was built for them
2 — Their situation	A one-slide playback of what you heard in discovery, in their language
3 — The gap	What's missing between where they are and where they need to be by their stated deadline
4 — The model	How the managed Talent Layer works — senior oversight, dedicated specialists, simplified compliance
5 — The recommended scope	The specific talent clusters and deliverables proposed for this engagement
6 — Case study	One relevant prior engagement, ideally a similar market-entry or industry situation
7 — Timeline	Milestones mapped to their stated deadline, not a generic project timeline
8 — Investment	Pricing framed against the cost and delay of building an equivalent team internally
9 — Why DECHUB BRIDGE	The three or four differentiators most relevant to what they specifically care about
10 — Next steps	A specific, dated proposed next action — never left open-ended

PLAYBOOK NOTE

If you can't fill in Slide 2 with specifics from the actual discovery call, the deal isn't ready for a pitch yet — go back and complete discovery properly rather than presenting on assumptions.

Quick Reference Card

One page to pin up. Everything else in this manual explains why these numbers and stages are what they are — this page is just the numbers and stages themselves.

Pipeline stages

Prospect → Qualified Lead → Discovery → Proposal → Negotiation → Closed Won / Closed Lost → Onboarding → Account Growth

Lead score bands

Hot (8-10) same-day outreach · Warm (5-7) outreach within the week · Nurture (2-4) grooming cadence · Disqualified (0-1) log and close

Daily targets

15-30 leads scraped · 10-20 outreach sends · <4hr reply time

Weekly targets

8-12 qualified leads · 2-4 discovery calls · >15% response rate

Follow-up rule

Five touches, roughly 3-4 weeks, then move to grooming. Never overdue more than 48 hours.

Escalate immediately when

A deal stalls 10+ business days · Non-standard pricing/terms are requested · A client raises a complaint or risk signal

Golden rule

If it isn't in the CRM, it didn't happen.

Document Control

This manual is a living document, owned by the function it describes.

FIELD	DETAIL
Document title	Business Analyst Operations Manual
Owner	DECHUB BRIDGE – Business Analyst function
Version	1.0
Status	Active
Distribution	Internal – Business Analyst, Sales, and Leadership teams

Revision history

VERSION	SUMMARY OF CHANGE
1.0	Initial publication — full 31-chapter manual covering business context, the 30-day onboarding plan, lead generation, discovery, pitch, proposal, pipeline, KPIs, SOPs, tools, templates, and best practices

HOW TO PROPOSE A CHANGE

If a process in this manual no longer matches how the work actually happens, raise it with your manager and note the suggested change in your next Weekly Report. This manual should always describe the job as it's actually done, not as it was designed on day one.

Operating Independently From Here

By the end of the 30-Day Plan, this manual should function as a reference you return to, not a script you re-read start to finish.

The role doesn't get easier with time so much as it gets faster: the same research instincts, qualification discipline, and documentation habits built in the first month compound into a pipeline that runs itself day to day. Revisit Chapter 14's KPIs monthly against actuals, revisit the ICP in Chapter 7 quarterly against what's actually converting, and treat every closed-won and closed-lost deal as a chance to sharpen both.

STANDING REMINDER

This is a living document. When a process in here stops matching how the work actually gets done — update it, don't just work around it. The next Business Analyst who reads this manual should get the current version of the job, not the version from launch day.
